He had been out late. When he reached his residence the church clock was chiming five. Heavy, weary, disguated, he opened the front door with some difficulty, and softly toiled up the stairs, entering the bed chamber with elaborate caution.

Thank goodness, sho was asleep!

He dropped into a chair, and, without taking off his coat or hat, began to remove his shoes. One he placed with great care upon the floor, but, ainst as he took off the other it slipped out of his hand and fell with a loud noise.

"Wifey" awoke on the instant.

She looked at him and then at the summer sanlight that streamed through the blinds.

"Why, George, what are you getting up

Why, George, what are you getting up

Talk about reprieves!

"Why, my dear," replied George, with the clearest enunciation of which he was capable, "I found I couldn't sleep, so I thought I'd get up and go out and take a walk."

And out the poor wretch went, dragging himself round wearily for an hour upon the verge of tears and torpor.—Cincinnati En-

TWO RARE BOOKS

Added to the New York City Library— One is an Old Edition of John Wesley's Hymnal.

to the New York public library by adding to the sheathing on the inside Trustee Alexander Maitland. The more a layer of the best coal tar paper put important is John Wesley's first hymnal, an octave volume of 74 pages, print at the studding, then fur out on the ed at Charleston, S. C., by Lewis Tim- inside and add another sheeting of othy, in 1737.

Prior to the discovery of this little book the supposedly earliest Wesley collection was an edition-also rarepublished in London in 1738, a year la-ter than the Charleston production. Mr. Maitland acquired the book recently by private purchase. He would not tell ow much he gave for it.

The other is a volume of "The Laws, statutes, ordinances and constitution, icebox is 21/2 feet square, the partition ordained, made and established by the between it and the storage is made by Mayor, the Recorder, Aldermen and as- setting two by four studding six inches sistants of the City of New York, convened in Common Council for the good side from the bottom of the ice chest rule and government of the inhabitants within four inches of the ceiling. The of the said city." This book was published in 1749.

DAIRY REFRIGERATOR. Small Building of Wood That Is Ensily Put Up North of Any

Large Farmhouse. Plans for a small driry refrigerator for mitk and butter from five cows are wanted by J. R. B., who has 15 loads of ice and a good cool well. He wants a building of wood and located north of a large farmhouse, around

which is a maple grove.

The plan illustrated herewith calls for an addition of 6 by 11 feet on the north end of the house. Aeross one end of the room thus made, see Fig. 2, is partitioned the refrigerator proper, the rest of the room being used as a milk This will give room to work around the cabinet creamer which I would set in the southwest corner. The walls, ceiling and partitions should be made by first sheeting up both sides of Two rare boo's have been presented the studding with matched flooring, on in such a way that the joints match matched flooring and building paper, fur out once more, and add a third and last sheeting of matched flooring. This gives three dead air spaces. The doors should be built up in the same way as

the walls and the edges beveled so as to close practically tight. The room to be used as a refrigerator is divided into two compartments, one for ice and the other for storage. The apart and sheeting up on the storage openings thus left at the bottom and the top furnish a means for circulation air, which will pass into the top of the ice box from the storage room, where it has become warm, while the cold air from the ice passes out below

Storage

HOUDE . S. REFRIGERATOR AND CREAMERY. of two by fours two inches apart. This grating may be made by nailing the two by fours onto both sides of the stude forming the partition.

The water from the melting iceshould be conducted from the drip-pan to the outside by means of a pipe, proved with a trap, the trap being necessary to prevent an outflow of cold air with the water. The sides of the ice box should be lined with four-inch strips of inch stuff about one inch apart, the edges planed to a bevel as in Fig. 1, so that the drip where the ice against the sides will fall to the inside and into the pan below. The shelves in

the floor to the ceiling. The door into The man who tells you a secret, and asks you not to tell, doesn't treat you right; he enjoys telling it, and farbids you having a good time.—Atchison Globe.

double glass, about three feet long and double glass, about three feet long and 11/2 feet high, well up in the side of the wall, will give aufficient light. The sides of the building should be well banked up, so that the space under the floor will be dry and the air dead. -Prof. G. H. True, Michigan Experimental Station, in Farm and Home.

> Proper Manuring of Trees. The mistake of many people in manuring trees is to place the fertilizer as near the trunk as possible. That is very much like feeding a man held in upright position by placing the food near his feet. More frequently, however, the manure is spread as far as the branches extend from the trunk. The feeding roots of large trees are mainly much or even four rods from an apple tree in full bearing, and within a year or two roots will extend this distance and find the fertilizer they need. In most orchards tree roots interlace each other, and this crowding is one reason why requires extra high feeding in such cut out the result in many cases would be more and better fruit than now on

those left standing.—Prairie Farmer. Skilled Men in Demand. The demand for skilled buttermakers is expected to be greater this season than ever before. A number of creamerymen have been heard to expres themselves as being through experi-of nothing but "corn and hogs, more corn and more hogs," menting with poor, cheap help, as it has proven very expensive, and they will begin this season with competent help. It is to be hoped that every creamin the week that will be on top next fall.-N. Y. Produce Review.

Advantage of Grass. Land which is in grass is protected washing or oxydation which occurs in bare plowed flal is so left between crops. should refuse him a few cherries. When animals are pastured on land, the soil fertility is drawn upon to the extent of nitrogen, phosphoric acid and potash required to build and sustain the body of the animal. But this is comparatively small, and if the manure numle is returned to the land and concentrated feeds are fed, there may be an actual gain in fertility. Also, if the grass consists of clover or other legumes, which draw supplies of nitrogen from the air, there will be a gain in fertility.—Prairie Farroge. fertility.--Prairie Farm

RURAL MAIL SERVICE.

Ivelate Has Patented a Unique Device for the Collection and Distribution of Letters.

A good many crossroads postmasters will lose their jobs when the government adopts the system of delivering and collecting shall in the country, which has just been patented by Thomas J. Crowder, of Virginia. His invention forms a valuable adjunct to the suburban system now being developed for the relief of country residents. consists of a box somewhat larger than those now used in the cities as mail depositories, and these are to be erected at convenient centers along the country roads. Two keys are allotted to each residence in the vicinity. The

RURAL MAIL BOX.

first door comprises one entire side of the box, and when this is opened it falls to a horizontal position and acts as a shelf. A number of small individual boxes are revealed, and the second key furnished opens one of these. For the sake of convenience in distributing the mail these many little doors form one large one, which when opened by the carrier gives access at once to all the private boxes; but when he has closed this shield the mail in each of these compartments is secure from examination by any others than those holding

the keys of that particular box. A large space is reserved in the bottom as a depository for mail matter that is dropped in the usual way

HEAR THE OTHER SIDE.

The Moral Aspect of Poor Roads Amusingly Discussed by a New York Newspaper.

Of late years we have been hearing but one side of the roads question, till the world has come to think that there is but one side. While only a bold man would say that poor roads are better than good roads, something is to be said in their favor, and some sympathy is due those despised and rural persons that do not join in the general pean in favor of good roads. Not that one would for a moment oppose the present agitation for them, any more than one would oppose Sunday schools, Both are commendable; yet even as one would not wish this world one the expenditure for find propagation, large Sunday school, so one should be a result probably unsurpassed in any moderate in one's desire for faultless other line of fish culture. highways.

Imagine what it would be to have fisherws is not the only object to be grained in maintaining the supply of ecstatic thrills it now experiences in tween the different species of fish in watching the clay or loam quagmires change, drop by drop, back into the delightful roads they can be at times. Perfect roads would be as dull as the

ideal social state. In a more important way humanity would lose. Good roads, in a few short years, would sap the moral fiber which man has been cultivating through ages. Time may come when we shall not need the ethical stimulus of poor roads, but with the young, which later descended it is far off. The Yankee gains the sharpness and doggedness of the gran- ing the cod, haddock and other offite he daily drives over. The Virginian shore species, which were caught in has superimposed on his natural im- great abundance within a short dispetuosity, patience and endurance from that red clay of his, which no mere impetuosity can conquer. The Floridian develops his character through his calming sand; the Illinoisan from his bottomless black mud. And finally-if more argument be needed-poor roads restrain the motocycle to its native lair of the noisome farther from their trunk than their city, and keep it from defiling the branches. Bury some dead animal three beautiful rural districts.—N. Y. Commercial Advertiser.

Practical Poultry Points. At a farmers' institute in Iowa a lady read an essay telling how she made a profit of \$300 annually from her flock of about 75 hens. In the discussion the trees are so often unproductive. It that followed, one man, who said he could not spare time from taking care cases to keep the trees vigorous enough of his cornfield one year to build coops to be fruitful. If every other tree were for the chickens, admitted that the chickens and eggs his wife sold brought in more money than his corn crop. Another woman, who had sold \$420 worth of poultry to the local poultry dresser where she lived, said that the men could talk poultry when the ground was frozen five feet deep, but when spring comes they will forget it all, and think

Woodpecker Is Man's Ally. "Every time we have a celebrity with us," said the chief clerk at one of the leading hotels, "I am certain to be deluged with autograph albums. They are left by people who calmly request me to waylay the notable and get his or her signature, preceded if possible by some neat and appropriate sentiment, verse preferred. It would be a pretty ticklish task if it were not for the fact that the celebrities themselves are broken in to that sort of thing and have ceased to regard it with any surprise. As a rule, no explanation is necessary and all I have to do is to hand over the little books. The autograph hunters are particularly keen The autograph hunters are particularly keen after theatrical stars, and there is one well-known manager who derives a good deal of amusement in acting as proxy. Last time he was here he was with an eminent actress he was here he was with an eminent actress and I had been intrusted with no less than a dozen autograph albums. I received specific injunctions from the owner of each to get 'something characteristic,' and I turned the bunch over to my managerisi friend. 'Here's where I make a hit!' he exclaimed enthusiastically, and, grabbing a pen, proceeded to inscribe an enigmatical sentiment' of his own manufacture in every volume. I remember one, which ran like this: 'Is not the expression of emotion merely the emotion of expression? Truly yours, Miss So-and-So.' The others were equally incoherent, but somehow they had a wise sound and the autograph chasers were required to the comments they made as they studied the gibberish after the books were returned, and I am willing to bet they are still wrestling with the inner meaning of their return. were returned, and I am whiling to bet they are still wrestling with the inner meaning of their prizes. The star herself has the reputation of being quite a student, and if she knew of the little joke that was perpetrated in her name I am inclined to believe she would get after her manager with a club."—N. Nervous People.

Nervous people not only suffer themselves but cause more or less misery to everyone around them. They are fretful, easily worried and therefore a worry to others.

When everything annoys you, when your pulse beats ex-cessively; when you are startled at the least unexpected sound, your nerves are in a bad state and should be promptly attended to. Nervousness is a ques-

the nerves is what you need to put you right, and the est nerve food in the world is Dr. Williams' Pink Pills for Pale People.

They give strength and tone to every nerve in the body, and make despondent, easily irritated people feel

tion of nutrition. Food for

that life has renewed its charms. Here is proof: Miss Cora Watrous, the sixteen-year-old daughter of Mr. I. C. Watrous, of 6: Clarion St., Bradford, Pa., was seized with a nervous disorder which threatened to end her life. Emittent physicians agreed the trouble was from impoverished blood, but failed to give relief. Mr. Watrous heard Dr. Williams' Pink Pills for Pale People were highly recommended for nervous disorders, and gave them a trial. Before the first box had been taken the girl's condition improved. After using six boxes herappetite returned, the pain in her head ceased, and she was stronger than ever nefore. "My daughter's life was saved by Dr. Williams' Pink Pills for Pale People," said Mrs. Watrous. "Her condition was almost hopeless when she commenced taking them, but now she is strong and healthy. I cannot recommend these pills too highly."—Bradford (Pa.) Era.

The full name is on each packade. Sold by all druggists or sent, postpaid, by the Dr. Williams Medicine Co, Schenectady, N.Y. Price 50 per box; 6 boxes \$250
